## FISCAL ANALYSIS

### ASSUMPTION

Officials at the **Department of Elementary and Secondary Education (DESE)** assume there is no fiscal impact from this proposal.

Officials at the **Columbia Public Schools (CPS)** assume CPS does not teach or require CPR instruction for high school graduation. CPS appreciates the window on this waiting until 2016-17, however as most students take their health course as a freshman, our 2016-17 and 2017-18 graduates would have missed the course as well. With that perspective our fiscal impact would be greater in those two years and 2015-16 as we would have to provide the education to not only freshmen but those in their 10th, 11th and/or 12th grade years.

With approximately 1,250 freshmen each year and this requirement, we assume some additional staffing in order to cover the subject with each high school health class at some point during the year. We estimate this to be at least one part time teaching position or 300 hours of support from a local provider. The cost anticipated for this time is roughly \$20,000. Should the requirement change to include certification of these students, we estimate the annual cost to increase to over \$30,000.

During the next three years to catch up with the students who have already completed 9th grade health and PE, the cost would be expected to be double of the amount shown above.

**Oversight** notes this proposal requires high school students to receive thirty minutes of instruction in cardiopulmonary resuscitation in order to graduate. This proposal starts with the 2016-2017 (FY 2017) school year. Currently school districts have the option of providing this instruction. Oversight can not determine how many schools may currently teach this class.

**Oversight** assumes school districts per this proposal, would include this instruction in their required health or physical education courses. Oversight assumes that since it is only thirty minutes of instruction it can be added to the existing health and physical education classes. Therefore, Oversight will not show an impact from this proposal.

FISCAL IMPACT - Small Business

No direct fiscal impact to small businesses would be expected as a result of this proposal.

FISCAL DESCRIPTION

Beginning in the 2016-17 school year, a student may not receive a certificate of graduation from any public or charter school unless he or she has received 30 minutes of cardiopulmonary resuscitation instruction given any time during the student's four years of high school and included in the school district's existing health or physical education curriculum.

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
